¹ Beginning with the statement for December 31, 1958, the computed average interest rate on the public debt is based upon the rate of effective yield for issues sold at premiums or discounts. Prior to December 31, 1958, the computed average rate was based upon the coupon rates of the securities. This rate did not materially differ from the rate computed on the basis of effective yield. The Treasury, however, announced on November 18, 1958, that there may be more frequent issues of securities sold with premiums or discounts whenever appropriate. This "effective-yield" method of computing the average interest rate on the public debt will more accurately reflect the interest cost to the

Treasury, and is felt to be in accord with the intent of Congress where legislation has required the use of such rate for various purposes.

² Computed on true discount basis.

³ Statutory debt limit is changed by the Act approved June 30, 1959, from \$283 billion to \$285 billion. From February 26 to September 2, 1958, the limit was \$280 billion and from September 2, 1958, to June 30, 1959, it is \$288 billion. From July 1, 1959, to June 30, 1960, the limit will be \$295 billion. Thereafter it will revert to \$285 billion.

¹ Redeemable at the option of the United States on and after dates indicated, except where otherwise stated. In case of Treasury bonds and Treasury bonds, Investment Series B-1975-80, now outstanding, such bonds may be redeemed only on interest dates, and 4 months' notice of redemption must be given.

² Treasury bills are non-interest-bearing and are sold on a discount basis with competitive bids for each issue. The average sale price of these series gives an approximate yield on a bank discount basis (360 days a year) as above indicated. This yield differs slightly from the yield on a true discount basis (365 days a year) which is shown in the summary on page 5.

³ Arranged according to earliest call dates.

⁴ Redeemable, at par and accrued interest, to date of payment, at any time upon the death of the owner at the option of the duly constituted representative of the deceased owner's estate, provided entire proceeds of redemption are applied to payment of Federal estate taxes due from deceased owner's estate.

⁵ The items not subject to the statutory debt limitation are keyed to this footnote and consist of (a) Panama Canal bonds; (b) certain matured debt; and (c) certain debt bearing no interest.

⁸ Approximate yield if held from issue date to end of 10-year extension period.

⁹ Owners have the option of retaining the matured bonds for a further 10-year period and earning interest upon maturity values thereof. During this additional 10-year period interest on bonds bearing issue dates of May 1, 1941, through April 1, 1942, will accrue at the rate of 2½ percent simple interest each year for the first 7½ years, and then increase for the remaining 2½ years to bring the aggregate interest return to approximately 2.9 percent, compounded semiannually. On bonds bearing issue date of May 1, 1942, through April 1, 1957, interest will accrue after maturity at the rate of approximately 3 percent per annum, compounded semiannually, for each half-year period of the extension period.

¹⁰ If held from issue date to end of 10-year extension period, bonds of this series dated January 1, 1942, through April 1, 1942, yield approximately 2.9 percent and those dated May 1, 1942, through December 1, 1942, yield approximately 2.95 percent.

¹¹ Matured bonds of this series yield approximately 2.95 percent if held from issue date to end of 10-year extension period, and unmatured bonds of this series yield approximately 2.9 percent if held to maturity.

¹² Bonds with issue dates February through April 1957, at the option of the owner, may be held and will accrue interest for additional 10 years.

¹³ Excess of redemptions, not yet classified by yearly series, deduct.

¹⁴ The face value of United States savings bonds of Series F or G of any yearly series maturing from month to month which are not currently presented for retirement will continue to be reflected as interest-bearing debt until all the bonds of the series have matured. Thereafter, the total amount outstanding is reflected as matured debt on which interest has ceased.
